

REMARKS

This is in response to the Office Action mailed on July 13, 2007. Claims 1-25 are pending in the application and are rejected under 35 USC § 103(a). Claims 1, 9, 10, and 18 are presently amended to clarify the claimed invention. In addition, Claims 10, 11, and 18 are presently amended to address non-substantive typographical errors. For at least the reasons set below, Applicants assert that all claims are in condition for allowance.

Acknowledgement of Information Disclosure Statement

As a preliminary matter, Applicant requests that the Examiner acknowledge that the references cited in the Supplemental Information Disclosure Statement filed December 31, 2003 have been considered. Copies of the Supplemental Information Disclosure Statement and return post card are enclosed herein. Applicant requests consideration and entry of the cited references.

Claim Rejections Under 35 U.S.C. § 103

Claims 1-25 were rejected under 35 U.S.C. 103(a) as being obvious over Wolfberg in view of Sullivan and Farry. Applicant respectfully submits that the cited references, each alone or in combination, do not teach or suggest all of the limitations of the claims as amended required by MPEP § 2143. Specifically, as described in more detail below, the independent claims recite "the user's communication which is responsive to the context sensitive automated coaching" and "context sensitive automated coaching determined by ... a user's communication." Nowhere do the references teach or suggest this reciprocal relationship.

Claims 1, 9, and 18 recite the implementation of a communication component which captures communication by the user in response to a presentation of portfolio modeling and the automated coaching. This limitation, of dynamically capturing the intentions and expectations of a user in response to the context sensitive automated coaching, are not taught or suggested in the references separately and are missing from a proposed combination involving Wolfberg, Sullivan, and Farry.

The fourth clause of Claims 1, 9, and 18 recites the context sensitive automated coaching being responsive to the user's communication. This more clearly indicates the ability of the graphical user interface to facilitate dynamic communication between the

system and the user, as the context sensitive coaching further responds to the user's communication in a cyclical fashion.

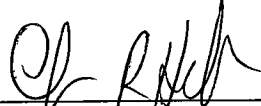

Claims 1, 9, and 18 also recite an automated coaching system limitation. The first clause in each of these claims includes the term "automated" before "coaching," which clearly indicates that the user selectable service level involves the use of coaching that is automated.

Therefore, because the combination of Wolfberg, Sullivan, and Farry fails to teach or suggest each and every limitation, Applicant respectfully asserts that a *prima facie* case of obviousness has not been established and that these claims are allowable. Further, because claims 2-8, 10-17, and 19-25 depend either directly or indirectly from independent claims 1, 9, and 18, these dependent claims are also allowable as depending from allowable claims. Applicant respectfully requests that the rejection of all claims under § 103(a) be withdrawn.

CONCLUSION

Accordingly, Applicants respectfully request removal of the rejections, and for favorable action and allowance of the application. In the event a telephone conversation would expedite the prosecution of this application, the Examiner may reach the undersigned at (612) 607-7237. If any fees are due in connection with the filing of this paper, then the Commissioner is authorized to charge such fees including fees for any extension of time, to Deposit Account No. 50-1901 (Reference 60021-375901).

DAYCO STATEMENT REGARDING RELATED APPLICATIONS

Sir:

In the recent case, *Dayco Products, Inc. v. Total Containment, Inc.*, 329 F.3d 1358; 66 U.S.P.Q.2d 1801 (Fed.Cir.2003), the Federal Circuit stated (1) in the context of 37 C.F.R. § 1.56, a co-pending application may be "material" in the prosecution of a patent, even if the co-pending application cannot result in a shorter patent term; and (2) in the context of 37 C.F.R. § 1.56, a contrary decision of another examiner reviewing a substantially similar claim meets the threshold level of materiality.

In light of *Dayco*, Applicant respectfully identifies the following United States patent applications, which are or were co-pending with the present application and may contain similar subject matter as the present application:
